

# P4 Apps WG meeting

1/18/2018

# Agenda

- Spec release versioning
- Changes to Telemetry Report spec
- New approaches for INT L45 indication
  - IP Options
  - Probe Marker

# Release versioning

- Version number format: [*major.minor*]
- Major revisions
  - When introduced changes break backward compatibility against the previous release
  - Major revisions will advance '*version*' field value in the headers
  - Header *version* number = Spec *major* number
- Minor revisions
  - Semantic changes, minor revisions/fixes, which are backward compatible within the same major number
- v0.5 cut from the specs of today (Jan/18, 2018) both INT and Telemetry Report
  - Version field in their headers = 0
- Next revision will be v1.0, encompassing changes under discussion
